

Contents of Volume 64

Number 1

- 1 The use of graph theory in the sensitivity analysis of the model output: a second order screening method
F. CAMPOLONGO & R. BRADDOCK (Australia)
- 13 Evaluation of the unavailability of a multistate-component system using a binary model
O. POURRET, J. COLLET & J.-L. BON (France)
- 19 Age-dependent reliability model considering effects of maintenance and working conditions
S. MARTORELL, A. SANCHEZ & V. SERRADELL (Spain)
- 33 Joint redundancy and maintenance optimization for multistate seriesparallel systems
G. LEVITIN & A. LISNIANSKI (Israel)
- 43 A hybrid approach for identification of root causes and reliability improvement of a die bonding process—a case study
H.-X. LI (Republic of China) & M. J. ZUO (Canada)
- 49 Automatic construction of Markov transition matrices under state and functional dependences
B. TOMBUYES (Belgium)
- 59 Neural network approach to sensitivity and uncertainty analysis
M. E. RICOTTI & E. ZIO (Italy)
- 73 An integrated probabilistic risk analysis decision support methodology for systems with multiple state variables
P. SEN, J. K. G. TAN & D. SPENCER (UK)
- 89 Reliability evaluation for hydrothermal generating systems: Application to the Spanish case
C. GONZÁLEZ & J. JUAN (Spain)
- 99 Application of the integrated reliability analysis system (IRAS)
G. KÓCZA & A. BOSSCHE (The Netherlands)
- 109 Development of an advanced humanmachine interface for next generation nuclear power plants
S. H. CHANG, S. S. CHOI, J. K. PARK, G. HEO & H. G. KIM (South Korea)

Technical note

- 127 Maintenance free operating period: an alternative measure to MTBF and failure rate for specifying reliability?
U. D. KUMAR, J. KNEZEVIC & J. CROCKER (UK)

Number 2

- 135 Editorial: Functional Modeling of Complex Systems
M. MODARRES (USA)

- 137 Diagnosis of multiple faults with flow-based functional models: the functional diagnosis with efforts and flows approach
L. CHITTARO & R. RANON (Italy)
- 151 Reasoning with multilevel flow models
M. M. (RENÉ) VAN PAASSEN & P. A. WIERINGA (The Netherlands)
- 167 Purpose and function in a collaborative CAD environment
M. A. ROSENMAN & J. S. GERO (Australia)
- 181 Function-centered modeling of engineering systems using the goal tree success tree technique and functional primitives
M. MODARRES (USA) & S. W. CHEON (Korea)
- 201 Plant functional modelling as a basis for assessing the impact of management on plant safety
B. RASMUSSEN & K. E. PETERSEN (Denmark)
- 209 Application of functional analysis techniques to supervisory systems
M. LAMBERT, B. RIERA & G. MARTEL (France)
- 225 Actant model of an extraction plant
H. POULSEN (Denmark)
- 241 Evaluating system behavior through Dynamic Master Logic Diagram (DMLD) modeling
Y.-S. HU & M. MODARRES (USA)
- 271 Goal-oriented systems modelling: justification of the approach and overview of the methods
A. JALASHGAR (Denmark)
- 279 An architectural model for software reliability quantification: sources of data
C. SMIDTS & D. SOVA (USA)
- 291 Human machine function allocation: a functional modelling approach
A. BYE, E. HOLLNAGEL & T. S. BRENDEFORD (Norway)
- 301 Application of functional modelling in the design of industrial control systems
M. U. SØRENSEN (Denmark)

Technical Note

- 317 Plant and safety system model
L. BELTRACCHI (USA)

Number 3

- 327 Safety system consideration of a supercritical-water cooled fast reactor with simplified PSA
J. H. LEE, Y. OKA & S. KOSHIZUKA (Japan)
- 339 Opportunity-based age replacement policy with minimal repair
J. P. JHANG & S. H. SHEU (Republic of China)
- 345 Identification of process and distribution characteristics by testing monotonic and non-monotonic trends in failure intensities and hazard rates
J. K. VAURIO (Finland)
- 359 Reliability study of two engineering models using LU decomposition
I. S. QAMBER (Bahrain)
- 365 Trending of equipment inoperability for commercial aircraft
J. T. LUXHØJ (USA)
- 383 The influence of variable operating conditions upon the general multi-modal Weibull distribution
M. NAGODE & M. FAJDIGA (Slovenia)
